

本子卡采用标准FMC HPC接口
HPC 具备8Lane高速收发器可驱动AD9144 四通道工作在1G基带数据速率
如果底板是LPC接口且DP0_XXX_P/N有一对高速收发器
那么恭喜,也可以驱动ADDA (采样率和通道数将受限)
并不影响你享受JESD204B的乐趣

红色引脚标号对应赛特凌威k7开发板的HPC接口
绿色引脚标号对应天嵌通途zu15eg开发板的HPC0接口(Demo优先使用)
蓝色引脚标号对应天嵌通途zu15eg开发板的HPC1接口
粉色引脚标号对应天嵌通途zu15eg开发板的HPC2接口
